Experience

Sirisoft Public Company Limited

Software Developer

AIA capital center

16 June 2024-Present

- Developed and customized enterprise web applications for banking and telecom clients using Angular, React, and Next.js (frontend) together with Java Spring Boot (backend).
- Designed and implemented RESTful APIs, integrating with PostgreSQL/MySQL databases to deliver secure, scalable, and high-performance transactions.
- Assisted in client consulting by analyzing requirements, proposing technical solutions, and delivering tailored software features.
- Collaborated with DevOps teams to deploy applications across cloud and on-premise environments.

Software Developer (Full Stack) | Softsquare Co., Ltd

Software Developer

Soft square group Headquarters

17 April 2023-31 May 2024

- Designed and implemented RESTful APIs with Spring Boot, integrating with PostgreSQL/Oracle databases to support large-scale transactions.
- Developed enterprise modules across frontend (Angular) and backend (Spring Boot, .NET ASP.NET) as core responsibilities.
- Collaborated in deploying applications to on-premise servers; occasionally assisted in preparing builds for Apple App Store, Google Play, and Huawei AppGallery.

Project

Sirisoft Public Company Limited (13 Nov - Present) Project : ONE 31

- Ensured a seamless production release by diagnosing and resolving 125 defects during UAT, partnering with QA to guarantee high system stability and performance.

Sirisoft Public Company Limited (Aug 2025 - Sep 2025)Project: KTB CEM (Credit Experience Management)

- Developed a secure file management module enabling users to upload and download files seamlessly.
- Implemented data extraction and structured display features, improving data accessibility and accuracy for end-users.
- Enhanced system security by integrating role-based access control and error handling, minimizing file processing errors and ensuring compliance.
- Delivered an intuitive Angular-based UI that improved user experience and reduced training time for staff.

Sirisoft Public Company Limited (Jun 2025 (2 weeks)) Project: KTB Data Encryption Support

- Built Spring Boot batch application (.jar) for bulk encryption of financial data in PostgreSQL
- Implemented AES-256 with 256-bit Pepper for secure data migration and processing
- Developed scheduled batch jobs for encrypting sensitive customer information
- Handled large-scale data processing with Spring Batch framework

Sirisoft Public Company Limited (June 2024 – May 2025) Project: Krungthai Asset Management (KTAM)

- Developed the frontend with Angular, implementing UI components based on client specifications and design requirements, covering a large-scale system with 1,500+ sub-modules.
- Built reusable shared libraries to ensure design and functional consistency across the entire application, reducing duplicate development efforts.
- Debugged issues and optimized frontend performance, improving system efficiency and responsiveness for end-users.

Softsquare Co., Ltd (2023) Project: SSRU Web Back Office

- Developed and maintained both frontend (Angular) and backend (.NET 6.0) systems to support critical business operations.
- Implemented UI components based on provided designs, delivering responsive and user-friendly interfaces that improved usability.
- Provided technical support, troubleshooting, and issue resolution across multiple system modules, enhancing overall system performance, stability, and reliability.

Softsquare Co., Ltd (2023) Project: IWRM – Industrial Water Resource Management Back Office

- Developed and maintained the Front-end using Nuxt 3, ensuring seamless functionality and performance.
- Implemented UI components strictly following provided designs.
- Participated in UI revamp efforts to enhance user experience and modernize the interface.

Softsquare Co., Ltd (2023) Project: SMBC Web Portal

- Contributed to the development and maintenance of a banking system for Sumitomo
- Mitsui Banking Corporation (SMBC) as an outsourced developer under Fujitsu.
- Worked on the Front-end using jQuery and the Back-end using ASP.NET.
- Assisted in system enhancements, troubleshooting, and ensuring smooth operation of banking functionalities.

Softsquare Co., Ltd (Oct 2023 - May 2024) Project: เพื่อบูสท์แอป Mobile App (iOS & Android & Huawei)

- Maintained and supported the Mobile Application for iOS, Android, and Huawei using React Native for the Front-end and C# for the Back-end.
- Debugged and resolved application issues to optimize performance and enhance user experience.
- Managed the deployment process to App Store, Google Play Store, and Huawei AppGallery, ensuring smooth updates and releases.

Skills

Angular, TypeScript, C#, Java, .NET Core, Spring Boot, Prisma ORM, React, Nuxt 3, Next.js, SQL, Git, Tailwind Css, PrimeNg, HTML, CSS

Education

King Mongkut's University of Technology North Bangkok – Bangkok, Thailand
Master of Science in Digital Network and Information Security Management

May 2025 – Present

Kasetsart University, Kamphaeng Saen Campus – Nakhon Pathom, Thailand
Bachelor of Science in Information Technology Infrastructure
GPA: 3.07

Graduated: 2023
