EDUCATIONS

King Mongkut's University of Technology North Bangkok – Bangkok, Thailand
Master of Science in Digital Network and Information Security Management
May 2025 – Present

Kasetsart University, Kamphaeng Saen Campus – Nakhon Pathom, Thailand
Bachelor of Science in Information Technology Infrastructure
GPA: 3.07 | Graduated: 2023

TECHNICAL SKILLS/HARD SKILLS/SOFT SKILLS

Technical: Angular, TypeScript, C#, Java, .NET Core, Spring Boot, Prisma ORM, React, Nuxt 3, Next.js, SQL, Git
Interests: Cybersecurity, Machine Learning , AI

PROFESSIONAL EXPERIENCE

Ascend Money May 2026 - Current

- Developed backend services using Kotlin and Spring.
- Built and maintained REST APIs, batch jobs, and unit-tests.
- Developed automated tests using Robot Framework.
- Developed Grafana monitoring dashboards for system and transaction monitoring.

Sirisoft Public Company Limited Nov 2025 - Apr 2026
(13 Nov - Present) Project : ONE 31

- Ensured a seamless production release by diagnosing and resolving 125 defects during UAT, partnering with QA to guarantee high system stability and performance.

KTB CEM (Customer Experience Management) Aug 2025
Software Developer (Full Stack)

- Designed and implemented RESTful APIs for the KTB Customer Experience Management (CEM) system using Java Spring Boot, ensuring secure and efficient communication between frontend and backend.
 - Integrated APIs with a PostgreSQL database for encrypted financial data storage and retrieval.
 - Collaborated with frontend developers to connect Angular-based UI components with backend services.
-

PROJECT

KTB Data Encryption Support

Jun 2025 (2 weeks)

Software Developer (Back-end)

- Built Spring Boot batch application (.jar) for bulk encryption of financial data in PostgreSQL
- Implemented AES-256 with 256-bit Pepper for secure data migration and processing
- Developed scheduled batch jobs for encrypting sensitive customer information
- Handled large-scale data processing with Spring Batch framework

Software Developer (Front End)

June 2024 - May 2025

Krungthai Asset Management (KTAM) – Bangkok, Thailand

- Developed the front-end using Angular, implementing UI components according to client specifications and design requirements.
- Built reusable shared libraries to ensure consistency across the application.
- Debugged issues

Soft Square International – Pathum Thani, Thailand

Apr 2023

Software Developer (Full Stack)

SSRU Web Back Office

2023

- Developed and maintained both Front-end (Angular) and Back-end (.NET 6.0) systems to support business operations.
- Implemented UI components based on provided designs, ensuring smooth functionality and responsiveness.
- Provided technical support, troubleshooting, and issue resolution across multiple system modules to enhance performance and reliability.

2023

IWRM – Industrial Water Resource Management Back Office

- Developed and maintained the Front-end using Nuxt 3, ensuring seamless functionality and performance.
- Implemented UI components strictly following provided designs.
- Participated in UI revamp efforts to enhance user experience and modernize the interface.

2023

การยางแห่งประเทศไทย (RAOT)

- Developed and maintained both Front-end (using JavaScript and jQuery) and Back-end (Spring Boot).
- Provided bug fixes and technical support to resolve issues and improve system stability.
- Enhanced system performance and ensured seamless functionality across all modules.

2023

TAT Login

- Developed and maintained the Login System for TAT employees, enhancing authentication and security.
- Worked on a legacy project using Spring Boot for the Back-end and jQuery for the Front-end.
- Ensured system stability, resolved issues, and improved performance while maintaining existing functionalities.

2023

VFIN - ICE Consulting

- Developed and maintained the system using Angular for the Front-end and Spring Boot for the Back-end.
- Implemented features and functionalities according to the client's specifications and requirements.
- Ensured seamless integration and performance across the system, delivering a stable and efficient solution for the client.

2023

SMBC Web Portal

- Contributed to the development and maintenance of a banking system for Sumitomo Mitsui Banking Corporation (SMBC) as an outsourced developer under Fujitsu.
- Worked on the Front-end using jQuery and the Back-end using ASP.NET.
- Assisted in system enhancements, troubleshooting, and ensuring smooth operation of banking functionalities.

2023-2024

เพื่อแม่ใจ Web Back Office (Oct 2023 - May 2024)

- Maintained and supported the Back Office system, developing both Front-end (Angular) and Back-end (.NET 6.0).
- Provided technical support, investigated, and resolved issues reported by end-users.
- Debugged and fixed system bugs to ensure smooth operations and enhance user experience.

2023-2024

เพื่อแม่ใจ Mobile App (iOS & Android & Huawei) (Oct 2023 - May 2024)

- Maintained and supported the Mobile Application for iOS, Android, and Huawei using React Native for the Front-end and C# for the Back-end.
- Debugged and resolved application issues to optimize performance and enhance user experience.
- Provided on-site support for reported cases and fixed security vulnerabilities identified during Pentest assessments.
- Managed the deployment process to App Store, Google Play Store, and Huawei AppGallery, ensuring smooth updates and releases.
